### **Reasons for Allowance**

2. The following is an examiner's statement of reasons for allowance:

**Regarding claims 1-60**, the prior art fails to teach or suggest an IP Packet Access Gateway (IP PAG) system and method for managing an IP bearer path between IP endpoints comprising: a bearer connection address table for use by the traffic handler that associates the first IP bearer connection and the second IP bearer connection with the active IP bearer path, the bearer connection address table being constructed to provide bearer path pivot capability that allows the first IP bearer connection to participate in multiple IP bearer paths that respectively associate the first IP bearer connection with alternative second IP bearer connections that can be switched into and out of association with the first bearer connection by modifying the bearer connection address table to select one of the multiple IP bearer paths as the active IP bearer path.

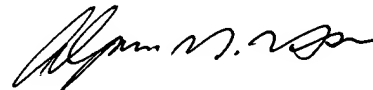

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
